

# Homework Zero

## *Syllabus & Schedule Acknowledgement*

### *1 The Syllabus*

Read the syllabus, and write a sentence or three<sup>1</sup> affirming that you read the syllabus.

### *2 The Schedule*

Write a sentence or three<sup>2</sup> affirming that you can be present for the exams– or if you can't, get in touch with me.

### *3 Object-Oriented Python*

If you didn't study the GWU BS or BA required course sequence, write a sentence or three<sup>3</sup> about your background in Python, and your background with object-oriented programming. It's okay if you're weak here, if you otherwise have a strong background in software.

If you studied the GWU BS or BA required course sequence, write a poem or an inscrutable sequence of emojis here (I know you're prepared for this course!).

In all cases, by answering this question, you acknowledge having Python 3<sup>4</sup> installed and ready to roll. If you need help, ask!

---

<sup>1</sup>Or two.

<sup>2</sup>Or two.

<sup>3</sup>Or two.

<sup>4</sup>Anything newer than 3.10 should work, assignments have been tested with 3.10, 3.11, 3.12.
